ROY F. WILCOX & CO. is engaged in the growing of indoor decorative foliage plants for use in the home, store and office. The company was organized in 1919 and is under the direct management of Mr. Roy F. Wilcox—who is the sole owner.

Mr. Wilcox is a graduate of Cornell University and has spent his entire life in horticultural pursuits. He is nationally known as a grower of quality Azaleas, as well as a foremost authority on decorative foliage plants. A native of Council Bluffs, Iowa, his family has operated large greenhouse areas there for many years.

The company is undoubtedly the largest grower of decorative foliage plants in the West and has been responsible for the introduction of many of the best foliage plants now commonly used for decorative purposes and has contributed largely to the promotion of this type of decoration. This establishment, consisting of more than fifty acres, requires the full time services of more than 120 employees to maintain its reputation as a grower of quality as well as the widest varieties of this type of plant material.

All inquiries pertaining to these plants must be directed to your local retail florist or nurseryman.
